

**Packaged Part Description
RC2-AAA**

Date: November 8, 2004

Summary:

Each die is packaged in a four-lead TO-18 header. One lead connects to the case and is labeled as GND. The common lead is connected to Pin 1. The two independent leads from the two capacitors are connected to Pins 2 and 4.

Device Designation: "AA"

Composition: 4% niobium doped 20/80 PZT (4/20/80 PNZT)

Thickness: 2700 Å

Capacitor Size:

White	10,000 μ^2
Yellow	4,000 μ^2
Black	1,000 μ^2
Silver	100 μ^2

Red

$25\mu^2$
